7:00 PM
at
The Field

Thanks to Ray & Mickey for upgrading our **wind sock pole!** The new one is much more durable & effective.

Field **mowing** has been bi-weekly, but at this point in the season we will begin extending this period. The next mowing is planned for 10/9, the Wednesday before our next Fun Fly.

We agreed not to distribute gift cards to the neighbors this year. Several factors, including the dip in membership & overall field use, significantly reduced our potential impact on the neighborhood. Neighboring households have previously been provided with our contact information, and we have never received any complaints. So, please continue to be considerate of those who live near the field. We are guests in their neighborhood.

Due to re-scheduling, several of us who intended to participate in the **EAA Family Fun Day** at *Hinde Airport* were unable to attend on September 22. I haven't heard anything following this event, and hope to get a summary during our next club meeting.

Our **Fun Fly** on the 15th reportedly went well, with most activity wrapping up around 3PM. Our next one is scheduled for Sunday, **October 13**. We plan to begin gathering around 10AM, but can fly all day. This will likely be our last organized Fun Fly for 2019, so stop out if you can!

The Westlake RC club is having their **swap meet** on Oct. 27. Our members are welcome to participate, and were emailed details last week.

Due to multiple schedule conflicts, we agreed to change our monthly meeting day to the **3rd Tuesday of each month**. So, our next meeting will be **Oct. 15**.

We are planning to have a **club Christmas dinner** at Martino's (Vermilion) again this year. When the date & time are finalized, I will let you know.

In the off-season, it has been suggested to include **simple seminars** into our monthly meetings. We have done this previously, and I always appreciate members sharing their experience, discoveries, or projects. Previous demonstrations included "electrical power system measurement", "LED lighting methods", and various build projects. So if you have something you'd like to share or request (from someone else), feel free to let me know, and we'll put it on the agenda! We can revisit previous topics too.

Jeff Williams
Secretary, LZRC
